Catalog #46

Revised Sept 29-2017

We are a very diversified store! We manufacture fiberglass car bodies and steel frames with our specialty being 1930's and 1940's Plymouth cars and trucks, 1930's and 1940's Dodge cars and trucks. We also carry other reproduction car lines, Ford and Chevrolet street rod kits and many other similar parts. We sell OEM parts, NOS and performance parts for antique cars, street rods, classics, and trucks. If it has to do with hotrods we can help you! Call our toll-free number 1-888-762-SRPM (7776). We accept all major credit cards and will gladly give you a competitive quote.

James D. Burge founded Street Rods, Parts & Memorabilia in 1994 in Wilmington Ohio. The Company was started to provide street rod parts and performance products in a small town environment and it grew to include just about everything you need for your 1930's and 1940's Mopar cars and trucks.

As many of you know, Ohio is one of the automotive high performance centers in the United States; therefore, SRPM wanted to be one of the leaders in this field. We carry almost all of the most popular name brands. Check out our store portion of our web page at www.srpmstreetrods.com for the complete list.

Since inception, the Company has continued to abide by its commitment to customer service and support.

We are also proud to announce that our products will now be available on our **eBay** store and we hope to continue to add new sources for our products

CRATING/HANDLING POLICY:

Crating charges are based on the cost of materials and labor required to crate the item for shipment. A handling/packaging fee will be added to all orders shipped. Canadian and overseas shipping must be prepaid or wire transfers prior to shipping.

DAMAGED CLAIMS:

Merchandise shipped via FedEx must be kept in the original shipping carton for FedEx inspection. Call the nearest FedEx depot to you if your shipment is damaged.

POSTAL:

Take the entire carton and damaged goods to your local Post Office and they will help you fill out a claim.

TRUCK:

Claims for damaged goods must be made within 5 days of receipt. Notify carrier that delivered the merchandise immediately that product was damaged and ask for instruction.

PRIVACY POLICY:

Any information gathered by our store will not be given out to anyone or any organization. We do not sell information and we do not use the data for any reason except to facilitate your purchase.

RETURN POLICY:

All returns must be in the original containers. Any product that has been installed is not returnable. **We have a 20% restocking fee on all returned items.** You also are responsible for the shipping to you and the return as well. All items purchased with a credit card will be credited to the purchaser's account less stated deductions for restocking and shipping fees. All items paid by check will require 10 days for the check to clear prior to your reimbursement. Special order items are not returnable. They require 50% down at time of order which is non-refundable without the written consent of Street Rods, Parts & Memorabilia (SRPM). The credit card will then be charged either when drop shipped from manufacturer or SRPM.

SHIPPING QUOTES:

When ordering large fiberglass or steel parts we will do our best to estimate the Shipping and crating costs at the time of the order. However due to the constant changes in shipping from different freight companies it is only an estimate. We reserve the right to adjust your bill to reflect the actual cost to ship the item and add it to your credit card after receiving the adjustment.

PAYMENT:

SRPM accepts all major credit cards: MasterCard, Visa, Discover, American Express, certified checks, money orders, or cashiers checks. We will gladly accept personal checks however, please allow 3 weeks for bank clearance. Sorry we do not accept C.O.D.'S. Special Orders require 50% down at time of order to include estimated shipping costs. The final payment will be debited from your card at time of shipment either from the manufacturer or SRPM. We reserve the right to debit your card for any adjustment to the original shipping estimate when applicable.

REFUNDS: Please follow our Return Policy for refund and warranty information.

SHIPPING: We will always ship the most economical means possible for our customers. Please inspect all parts on arrival for damage. If damaged, please notify carrier immediately. Sign bill of Lading with the word "DAMAGED", otherwise we can not be responsible for parts damaged by the carrier. Please call us for current shipping prices to your area

INTERNATIONAL:

All our packages will ship by USPO. Anything larger then their limit will go through International Freight.

FITTING: Our parts have been checked for proper fit at our facility and by our many customers. The molds have been taken from original parts. If you are having problems with fitting it could be because:

1. Your car has, at one time, been damaged or modified in someway causing frame or panel misalignment.
2. Because of human labor involved during the early years of production, cars right off the assembly line required hand crafting. For example, few if any, original fenders will directly bolt up to another steel body without having fitting adjustments. The same results can be expected of fiberglass.
3. Fiberglass is always curing, even months after it is made, the parts tend to conform to the shape of what it is resting on. The sooner the parts can be installed the better. Always store your fiberglass parts up right and in a cool place. Normally a heat lamp, sun, or non-flame heat source will return it to its original shape.

DISCLAIMER:

SRPM will not be responsible for the manner in which our products are used. Neither the seller, nor the manufacturer, shall be liable for any loss, injury, or damage, directly or indirectly, arising out of the use of, or the inabilities of the products. The user of any products we sell assumes all liabilities with any use of our products we sell. Will not be held liable for personal or property damage caused by the use or misuse of any products that we make or sell.

PARTS AVAILABILITY:

All products that are not in stock must be special ordered. Some items may be in stock one day and out of stock another. Due to the time constraints to manufacture many of our parts, we may require up to 7 to 8 weeks for the more difficult hand made items. We ask that you be aware of this and that you plan your projects accordingly. Please provide us with adequate time needed to enable us to get you your part when you need it. We can not make up for poor planning and manufacture a part immediately due to neglect to plan ahead on costumers' part. We require 50% down payment on all parts that are not in stock at the time of your order. The remainder when it is shipped to you. Since we are making these parts specifically there are no returns on special orders once we have taken your deposit. If you decide to cancel a special order item your deposit will be forfeited since the part was being made specifically for you, our customer. Be sure to ask the sales person at the time of your order if the item is in stock or if it has to be made. Once a part is special ordered you have made a contract to buy the part and your order can not be canceled without our written approval.

1933-48 Plymouth/Dodge Rear Suspension

Call for Pricing

Frame and rear end brackets come complete with all hardware and instructions ready for easy installation to the frame and rear end assembly. Adjustable all aluminum coil-over shocks come with your choice of springs. These kits are ideal for the do it yourself mechanic for quick delivery. These kits have been specifically designed for your 1933 & 1948 Plymouth or Dodge vehicles. The frame must be boxed for attachment of brackets. This system is available with QA1 shocks and is for centered housings. These shocks are made of 6061 T6 Aluminum, fully rebuild able and nitrogen charged with a revolutionary anti-leak system. These units are multi-setting to allow for stiffness or dampening adjustments. Shocks can use either bearings or bushings with rugged 9/16" piston rods, Big Piston design and easy assembly.

Great for street rods and race cars. Contact SRPM at 888-762-7776 (SRPM)
